==English== <lyrics> It's nice outside, let's go out from time to time First, let's walk slowly, barefoot We got up early, so we've got a longer Sunday than usual

Sit down next to me, we've got plenty of time The blue sky is clear Let's think about all kinds of things all day

When I lie on a big tree stump and look up at the wide sky I feel like I can do anything
This time may not last forever, but it's part of an endless road

Don't busy yourself, we've got plenty of time Our laugh echoes around And then it becomes quiet right away We're together, warming each other, oblivious to other people

But when our conversation stops and we become silent We relax And that's when our real time begins

I want to do this sometimes, we've got plenty of time The blue sky is clear and I feel like I can forgive anything We're together, warming each other Oblivious to other people, just for now

Sometimes an urge comes, sometimes the urge goes Sometimes people look at us Sometimes a dog runs by, sometimes kids run by
