

# Red Hot Chili Peppers, Make You Feel Better

She's the one she's the only one  
She's got ripped back light  
Gonna make me come  
I say... when I smile I'm a really smile  
I got dreams so wide like a country mile

I said now, I'll take it  
It's better for you  
Somehow we'll make it  
'Cause that's what we do

Pick a star in the open sky  
I see you see me and that is why I  
Hop along to the cowboy beat  
When I feel your fire jump up to me

I said now, I'll take it  
It's better for you  
Somehow we'll make it  
'Cause that's what we do

Something out there  
Where love is your only friend and  
We are the ones  
That will make you feel better

Someone to spare  
When love is the only end and  
We are the ones  
That will make you feel better  
Oh yeah

In a world that has run amok  
I've got to set my sights just to get struck  
I walk away from the rank and file  
With a punched out mouth and a pack of style

I say... she's the one she's the only one  
Make me search myself until I'm done... and  
Tell me now in a telegram  
Do the sea of stars, make a diagram... and

Something out there  
Where love is your only friend and  
We are the ones  
That will make you feel better

And, someone to spare  
When love is the only end and  
We are the ones  
That will make you feel better

Oh yeah, hell yeah, yeah  
Oh yeah

So alive I arrive on dust  
You can search my mind for the red on rust... I said  
Take me there and she really cares  
Lighting up for me gonna hear my prayers

I said now, I'll take it  
It's better for you  
Somehow we'll make it  
'Cause that's what we do

Something out there  
Where love is your only friend and  
We are the ones  
That will make you feel better

Someone to spare  
When love is the only end and  
We are the ones  
That will make you feel better

We are the ones  
That will make you feel better  
We are the ones  
That will make you feel better

We are the ones  
That will make you feel better  
We are the ones  
That will make you feel better, now
