

Red Sovine, Bear With Me A Little Longer

You say you're tired of struggling along bear with me a little longer
Seems like everything I do turns out wrong bear with me a little longer
It hasn't been easy I know at least up to now
But if you'll understand me half way in what I'm tryin'
And I know will make it somehow
I'll say a prayer for us tonight I'll pray that your love will grow stronger
And then everything will be alright bear with me a little longer

I've heard it said a million times you could have heaven on earth
But the long of average since things will be better
We've already been through the worse
I'll say a prayer for us tonight...
