

Reffer, Hi-technology

Today i woke up late
Sounds bring me down
Another world will open the doors
Maybe the future is cominh up
Day by day we suffer more
My friends are dying and i lost them all
I try to help them but i don't have the chance
The lights of destruction burn my eyes
Chaos and disorder build the fight
Brothers ans sisters kill themselves and i won't forget
Today my life is like a machine
The robots and cyborgs control the lights
Nowadays brains are like a shit
Everything and everyone's forget
Like the sunshine
They have the control and want to kill me now
I think that i will never be free
Where's my salvation?
My cybernetic world
When will all that be over?
Let's try to find something to believe in our future
