

Relative Ash, Hymen

approached and wrapped up tight
I'll share much more but please don't
dig deep and grow thick skin
know this I watched as he grew thin
identical standing in line choked up
for sure you look more like him than me
I poured from hearing your soft words
there's two I share my blood with her
pleasure caught up with him
so late but yet you first you carry what we long for
if sterile don't divorce your hand in marriage
brings our first
identical standing in line choked up
for sure you look more like him than me
I poured from hearing your soft words
there's two I share my blood with her
pleasure caught up with him
give me what I miss and just leave me alone
give her what she missed or just let her know
your father very very sick Mark, what?
they say it might be cancer, oh no
but we think it HIV
AIDS, he gonna die
I've seen too much I'm all choked up
I've seen too much
so what do you think of me now
I've been so
So what do you think of me now now now
choked up
at last I found
at last I really know she
at last I found
at last
so what do you think of me now
choked up
so what your feeling about me
now that I gone
what your feeling about me
can you smell her right
what your feeling about me
now that I here
what you say
choked up
