

Retard-O-Bot, Friendship Forever

My dreams come in every shape
And when I close my eyes
I can't help what I come to realize
That everything starts making sense
If I have something I'm trying to forget
Regret won't let me let it go
I can't shake it until I awake
Until I awake
Cut loose from these rules
That only hold me back and
Retract what I thought was clear
Now that I can't live this way
You're gone now
And nobody cares
And nobody cares
Year in year out, take that smile
(?)
(?)
I stuck around
This is what I need
My dreams come in every shape
And when I close my eyes
I can't help what I come to realize
That everything starts making sense
If I have something I'm trying to forget
Regret won't let me let it go
