

Rhesus, Just Let Go

If you ever get scared
alone in the dark
when the night's calling out
Play this song
and let it lull you to sleep
If you're worried about
conversation we have
Oh no, just let go
Play this song
and let it remind you its real, so real

So let me take you in my pocket
I will carry you around the world
It's out there waiting
'Cause we are meant to get along

If you'd ever let us collide
it'd be beautiful
(It's getting closer now)
So pay attention to the voices
in the back of your head
(I think I'm ready now)
I bet they're calling out
I bet they're screaming out loud, so loud

So let me take you in my pocket
I will carry you around the world
It's out there waiting
'Cause we are meant to get along

So let me take you in my pocket
I will carry you around the world
It's out there waiting

We're waiting!
