

# Ricky Nelson, Everytime I See You Smiling

Everytime I see you smiling  
I see a love so real  
And everytime I see you smiling  
Words can't explain the way I feel

If they made me king with a fortune  
And told me that I could rule the world  
It would take one thing more to make me happy  
That would be your love little girl

Everytime I see you smiling  
I see a love so real  
And everytime I see you smiling  
Words can't explain the way I feel

If they made me king with a fortune  
And told me that I could rule the world  
It would take one thing more to make me happy  
That would be your love little girl  
That would be your love little girl  
That would be your love little girl
