

Ring Of Fire, Blue Sky

Blue Sky

I wake up and wonder
How many days are gone
I look out my window
The blue sky goes on and on

Now my mind goes round and around
Feeling like I'm lost and found
Life is just a mystery
Guess that's the way it's supposed to be

No way to know by now
The happy ending
I've got to find somehow

Every time I remember
I get captured by the memory of you
Suddenly I can't go on

I've traveled so far now
But you're all I think about
Remember the last time
We just tried to talk it out

Life is just a mystery
Guess that's the way it's supposed to be

No way to know by now
The happy ending
I've got to find somehow

Every time I remember
I get captured by the memory of you
Suddenly I can't go on

No way to know by now
The happy ending
I've got to find somehow

Every time I remember
I get captured by the memory of you
Suddenly I can't go on
