Riverside, Second Life Syndrome

[Part One From hand to mouth]

From day to day From hand to mouth We're turning around Vicious ritual

Getting used to it all Falling down again We're waiting for The decrees of providence

I don't want to waste Any more of my life Live from day to day Live from hand to mouth

Facing the light I brush aside your plans I'm going to have It all my own way

And when that all shattered I felt I'd broken my fall Couldn't pretend that I felt strong about us anymore Without your help I finally started to live my own life I just want you to know this time

[Part Two Secret Exhibition]

I just want to feel your sigh on my neck Want to feel your breath Feel your need to stay You don't know my name Don't know my face Only thoughts I share in my secret place

Secret exhibition Cure for loneliness I've ground to a halt There's no turning back You know there are things I just can't forget You've helped me so much To learn to be detached

But when that all shattered I felt I'd broken my fall Couldn't pretend that I felt strong about us anymore Without that help I finally started to live my own life And I know I don't need you now

Secret exhibition Cure for loneliness Life is much too short to be whiled away with tears Secret exhibition Cure for loneliness I erase you now I don't need you now I erase you now with all of my past
