Riverside, Time Travellers

One day we'll find our way Straying from the road We thought we could go Until we would fade. /2x

Traveling across the fallen Earth And the foreign lands we survived To believe that this is not the end This is not the time

Moving unseen beyond The shadows, waiting for The birth of a star we can follow

One day we'll find our time Come to realize That our history Came full circle

Traveling across all the dried up seas And the foreign lands we survived To believe that this is not the end This is not the time

We crane our necks for youth
We know we'll make it through
And we can go back to the forest
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time

Traveling across all the dried up seas And the foreign lands we survived To believe that this is not the end This is not the time

We crane our necks for youth
We know we'll make it through
And we can go back to the forest
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time
Let's go back to the world that was 30 years ago
And let's believe this is our time
