

# Road Trip's Over, Don't Blame Me

So close your eyes and tell me what you see in the dark  
and pray to get the chance to leave this life and never come back again!  
Don't say to me on and on that you're living in fucked up world  
you created this world by yourself so don't blame me

ref:

Don't, don't blame me now

( I can't explain what you have done, I can't explain what I have done )

So close your eyes again and open your heart and tell me what it's like

do feel alone there? do you hear the voices

the worst is the nothingness everywhere around you!
