

Robben Ford, Good To Love Robben Ford

I didn't want to do it
Thought I could take my time
But all your attentions
Put me out of my mind

Beautiful face and beautiful form
Sweet lips to kiss through the night
We had a love of a special kind
We were dancing on the moon

You're so good to love
So good to love

Running down the beach with your umbrella
Plating like kids in the sand
Blue skies and butterflies
We two together

I can take you for my refuge
Or be the arms that hold you near
I can't stop lovin' you
Guess I'm yours forever

You're so good to love
So good to love

Sometimes I thin I must be crazy
It's a great world out there
But you make life worth livin'
Let's take a walk in the garden

You're so good to love
So good to love
