

Robert Earl Keen, I Wonder Where My Baby Is Tonight

I wonder where my baby is tonight
I wonder where my baby is tonight
That street lamp ain't sayin'
The moon is out of sight
I wonder where my baby is tonight

I love her more than roses love the sun
I love her more than roses love the sun
I've told her and I've told her
Baby you're the only one
I love her more than roses love the sun

She's been gone since early morning
She left here early yesterday
I lost my head and said some things
I didn't mean to say
She's been gone since early yesterday

She doesn't know the danger she'll find
She doesn't know know the danger she'll find
With no one to protect her
In a world that's so unkind
She doesn't know the danger she'll find

I've been every place from Cherry Street to Main
Every place from Cherry Street to Main
My mind is sick with worry
From callin' out her name
Every place from Cherry Street to Main

I wonder where my baby is tonight
I wonder where my baby is tonight
That street lamp ain't sayin'
The moon is out of sight
I wonder where my baby is tonight
