Robert Earl Keen, I Wonder Where My Baby Is To

I wonder where my baby is tonight I wonder where my baby is tonight That street lamp ain't sayin' The moon is out of sight I wonder where my baby is tonight

I love her more than roses love the sun I love her more than roses love the sun I've told her and I've told her Baby you're the only one I love her more than roses love the sun

She's been gone since early morning She left here early yesterday I lost my head and said some things I didn't mean to say She's been gone since early yesterday

She doesn't know the danger she'll find She doesn't know know the danger she'll find With no one to protect her In a world that's so unkind She doesn't know the danger she'll find

I've been every place from Cherry Street to Main Every place from Cherry Street to Main My mind is sick with worry From callin' out her name Every place from Cherry Street to Main

I wonder where my baby is tonight I wonder where my baby is tonight That street lamp ain't sayin' The moon is out of sight I wonder where my baby is tonight
