

Robert Palmer, Stone Cold

(R Palmer)

Hey hey take it from me she's a masterpiece

She ought to have her own show

Oh stone cold

Hey hey take it from me she's a masterpiece

Stone cold in love with you

Could you be ? or Van Gough

You're a work of art, my darlin'

You are the one I adore

You choose the role to star in

You've got the part - I'm all yours

My heart's in perpetual motion

When you make love with me

Beats so hard we reach an explosion

Of sensuality

You are poetry - I read your lips

They say just kiss me darling

The way you move - the way you speak

I got to have you cos I'm stone cold

Hey hey take it from me she's a masterpiece

stone cold in love with you

She ought to have her own show

Oh stone cold

Hey hey take it from me she's a masterpiece

Stone cold in love with you

Could you be ? or Van Gough

You want it all - you got it

You take the cake coz you wrote the recipe

You hit the mark

Spot on it

We make the grade coz we got the chemistry

Surfin' high on the waves of emotion

When you make love with me

8 miles high and deep as the ocean

That's how big love should be

You're a masterpiece - you're made for me

I just couldn't live without you

Say what you want - say what you need

I'll get it for you cos I'm stone cold

Hey hey take it from me she's a masterpiece

I'm stone cold in love with you

She ought to have her own show

Well stone cold

Hey hey take it from me she's a masterpiece

I'm stone cold in love with you

Could you be ? or Van Gough

My heart's in perpetual motion

When you make love with me

Beats so hard we reach an explosion

Of sensuality

You are poetry - I read your lips

They say just kiss me darling

The way you move - the way you speak

I got to have you cos I'm stone cold

Hey hey take it from me she's a masterpiece

Stone cold in love with you

She ought to have her own show

Babe I'm stone cold

Hey hey take it from me she's a masterpiece

Stone cold in love with you

Could you be ? or Van Gough

Stone cold

Hey hey take it from me she's a masterpiece

Stone cold in love with you

She ought to have her own show
Babe I'm stone cold
Hey hey take it from me she's a masterpiece
Stone cold in love with you
Could you be ? or Van Gough
