Rock Star Supernova, It's On

I feel suspended, lifeless Going through the motions Your inside, outside Waiting for the cause Desperate measures But it don't measure nothing All the pain left inside There's nowhere left to fall

All your spaces Darken places Come out From it all

Let it shine on Even when the day is done and all the light is gone Let it shine on You're running high but dark inside What little light has left you and shines on

Talking senseless Screaming from the benches Looking forward Not to fall behind Look through lenses Nothing ever cleanses Your rained out visions

From a cloudy mind

All your spaces Darkened places Come out From it all

Let it shine on Even when the day is done and all the light is gone Let it shine on You're running high but dark inside What little light has left you and shines on

I don't ever want to fade away A burned out record that I can't play Don't let me make the same mistakes That you have made before Nothing changes Can't you face it After all

Let it shine on Even when the day is done and all the light is gone Let it shine on You're running high but dark inside What little light has left you and shines on
