

Rocktopus, The Single

It's all right, it's okay
Things will never be the same.
Don't have to turn it upside down
Don't run your ship into the ground.
Call me cold, don't bother me
Look at you down on your knees.
Don't have to burn your bridges down
What if you fall down?

Chorus:

The single biggest reason that you left was cuz I pushed you away.
The single biggest reason that I pushed was cuzs I had no
Halo upon my head
Ring upon my finger
No sense of self and I couldn't tell you that I want you to stay.

Call it fate, call it right on time.
If I cared, I'd see the light.
Don't come knocking at my door, I live in hell.

Chorus:

The single biggest reason that you left was cus I pushed you away.
The single biggest reason that I pushed was 'cos I had no
Halo upon my head
Ring upon my finger
No sense of self and I couldn't tell you that I want you to stay.

SOLO

Chorus:

The single biggest reason that you left was cus I pushed you away.
The single biggest reason that I pushed was cus I had no
Halo upon my head
Ring upon my finger
No sense of self and I couldn't tell you that I want you to stay.
