

# Roger Clyne & The Peacemakers, I Know You Know

When you say I love you  
You know it'd better be true  
You walk away too slow honey  
I want to run after you

I know you know  
I know you better  
You better know  
I know you know

Wrote you a poem,  
A little haiku  
I want you under my skin  
My new tattoo, yeah!

I know you know  
I know you better  
You better know  
I know you know

You gotta move  
You gotta go or stay  
You better burn, you better yearn, you better churn, you better learn  
Or you're gonna see your colors start fadin' away

I like your medicine  
I like your birds and your bees  
Now don't you start thinking you've gotta buy the cure from them, sugar  
I know you know they're only gonna sell you the disease

I know you know  
I know you better  
You better know  
I know you know

I know you know  
I know you better  
You better know  
I know you know
