

# Roger Taylor, Good Times Are Now

(Roger Taylor)

Across the street your smile broke  
Like a wave upon my face  
You didn't notice me at all  
Across the street I saw you  
With some other pretty face  
I loved you then I love you now  
I loved you then I love you now  
I had to take a chance cos special moments  
Only tend to happen now and then  
I had to take my chance and grab the moment by it's ears  
Not be just some fly on your wall  
Had to take my chance there  
So I asked you out to dance there  
I loved you then I love you now  
I loved you then I love you now  
I had to take a chance cos special moments  
Only tend to happen now and then

Live for the present it's the only one we have  
Nobody get's out of here...alive  
Life in the future might never come to pass  
You know - good times are now

I loved you then I love you now  
I loved you then I love you now  
I had to take a chance cos special moments  
Only tend to happen now and then

Live for the present it's the only one we have  
Nobody get's out of here...alive  
Life in the future might never come to pass  
You know - good times are now

Across the street your smile broke  
Like a wave upon my face  
You didn't notice me around  
Across the street I saw you  
With some other pretty face  
I loved you then I love you now  
I loved you then I love you now  
I had to take a chance cos special moments  
Only tend to happen now and then

You know - good times are now
