Rollins Band, Change It Up

You say your job is a pain It's pulling you down the drain I think you'd rather complain

Than quit it

He knocks you to the floor

But you go back for more when you could walk out the door

He's a loser honey, leave him

Win lose or draw

I want it all

Life's so short

No safety net

You get what you get

What you settle for

You say your town is too small, you live your life at the mall

You can't have it all until you leave it behind you

And you wait for the day when luck will come home to stay

You never get your way

You go out --you make it

Win lose or draw

I want it all

Life's so short

No safety net

You get what you get

What you settle for

Don't justify your complacency to me

That's not an adventure, that's a job

You say you lack what it takes

You say your face lacks a face

There's a fact you gotta face

They broke the mold when they made ya

Living under a cloud

Living quiet or loud

Another face in the crowd

Or one in ten million

Win lose or draw

I want it all

Life's so short

Win lose or draw

I want it all

Life's so short, life's so short, life's so short, life's to short man
