

Rushlow, When You Dance With Me

There's an ocean of stars and a sea of moonlight
Raining down on us tonight
And the wind through the willows is singin' that song
I want to keep my arms around you all night long just holdin on

(CHORUS)

Caught up in the motion of your every move
So lost in the moment, spinning, falling into you
I'm everywhere I want to be
Girl, your love is all I need
When you dance with me

There's a magical moment when you take my hand
A chemistry I don't understand
The way our bodies start moving in time
The way you move me blows my mind
You blow my mind

(REPEAT CHORUS)

Dance with me

How can I be so lucky
To have you dancin' with me

(REPEAT CHORUS)

Dance with me
When you dance, when you dance with me
When you dance, your love is all I need
When you dance, when you dance with me
When you dance, your love is all I see
