

# Ryan Malcolm, October Skies

as we're driving top down  
through the streets of this town  
leave it all behind

gonna start our new life  
she's a dreams of spot light  
who knows what we'll find  
you don't have to be afraid  
as long as I'm with you  
we'll make our escape

everywhere I go  
on this open road  
I'll always be with you  
right here by your side  
Our love will never die  
become a cold lie (?)  
Underneath october skies

you threw me a life line  
got some angels in time  
words can say

If you had found your meaning  
love's a season changing  
brand new day

you don't have to be afraid  
as long as I'm with you  
we'll make our escape

everywhere I go  
on this open road  
I'll always be with you  
right here by your side  
Our love will never die  
become a cold lie (?)  
Underneath october skies

the summers come and gone  
and I know  
as the leaves all turn to gold  
there will be  
a promise that I'll make, whoa  
to you forever

you don't have to be afraid  
as long as I'm with you  
we'll make our escape

everywhere I go  
on this open road  
I'll always be with you  
right here by your side  
Our love will never die  
you become a cold lie (?)

you don't have to be afraid  
as long as I'm with you  
we'll make our escape

everywhere I go  
on this open road  
I'll always be with you

right here by your side  
Our love will never die  
you become a cold lie (?)  
Underneath october skies

Underneath october skies

Underneath october skies
