

S Club 7, Rain

Do you remember when we said goodbye
How the tears fell from your eyes
And then the rain came down and washed them away
Like stars colliding in the sky

And as I'm traveling through space and time
I feel your spirit at my side...

You know I love it when it rains
Cause I feel you're here again
I love it when it rains
You see the rain is like your tears
And though you're far away you're here
The rain will bring you near
I love it when it rains...

And now I've found a place
A precious stone
Is it a dream
Can it be true
A place that I can call my home from home
The only thing it need is you

You know I love it when it rains
Cause I feel you're here again
I love it when it rains
You see the rain is like your tears
And though you're far away you're here
The rain will bring you near
I love it when it rains...

I love it when it rains...
You know I love it when it rains
Cause I feel you're here again (Cause I feel you're here again)
I love it when it rains (You know I love it when it rains)
You see the rain is like your tears
And though you're far away you're here
The rain will bring you near
I love it when it rains...

It only seems like yesterday
That we were drowning in our love
I love it when it rains...
