

S.T.U.N., Boredom

Welcome all you aliens
Hello to the brave ones
This world belongs to all of us
So come on out and save yourselves

Welcome different sexualities
Let your bodies move in non-abandoned beat
We are the chosen ones
Step into the sun
This is not a notion...

Boredom is for humans, boredom is for human beings

We've got to change the scene
Everyone's a mutant
Take off your mask and let us see
We are the subterraneans
Youth and passion mania
Someday all of us
Will be wearing each other's make-up

Welcome different sexualities
Let your bodies move in non-abandoned beat
We are the chosen ones
Step into the stun
This is not a notion...

Boredom is for humans, boredom is for human beings

We've got to change the scene
Everyone's a mutant
Take off your mask and let us see

Our time is finally here
The new visions are clear
Take off your mask and let us see...
