

S.T.U.N., Social Disease

she called the line at 5
code generation spies
can you get me out alive?
i'm about to take a nose dive
into a social disease
who's weird is it you or me?

mommy lost her head in nine to five (daddy where'd you go now)
her dad left when she had just arrived
her hair, spiked and red dyed
combat boots, so she can stand high

above a social disease
who's weird is it you or me?
