

S.T.U.N., We Will Come To You

Learn to stand on your own
And you'll run into us
Universal answers wait by
In the conscious you'll find
We will come to you

You could heal with a strong will
We just have to get by
How we've been wronged from the lie
We will come to you

You're the end of the drone
When you're not what you've been shown
Money could never buy the chance to be alive
We will come to you
