

# Sailor Moon, Oh, Starry Night

I've waited all of my life

For the day when love appears  
Like a fairy tale in days gone by  
He will rescue me from my fears  
And now I feel him standing close to me  
And how can I tell him what he means to me  
My heart stands still -- has he come?

Oh starry night

Is this the moment I dream of?

Oh starry night

Tell me, is he my own true love?

Every night I think of him

Here in my lonely room

Waiting for my prince to come

Wondering if he'll be here soon

And I sit patiently, waiting for a sign

And I hope that his heart longs for mine

He calls my name, is he the one?

Oh starry night

Is this the moment I dream of?

Oh starry night

Tell me, is he my own true love?

Oh starry night

Is he the one that I dream of?

Oh starry night

How will I know

Will his love show?

Is he my own true love?
