

Savage Grace, We Came, We Saw, We Conquer

[Christian Logue]

We are the knights shining in armor

Satisfying desire

A hole in the soul of millions unknown

Void of the feelings we've never known

As we look to the stage into heaven

We gaze and our world of pain fades away

But the powers that fear our crusade bring

To bear all the might that their lies can buy

[Chorus:]

And we came, we saw, we conquered

And our call to arms rings on

And we came, we saw, we conquered

And the fire from cities ablaze won't die away

[2nd Verse:]

Power and the glory rits of the holy mesmerize

The masses

Seduced by it all awaiting the call we feel

The essence embrace our soul

In the guys that we take there can be no mistake

We are more than a great escape

None should fear what they know

Nor believe what they've told

Let the light of your truth take hold

[Chorus]

[Bridge:]

We came to know just we can do when

We let go of our fear

Chant: Have no fear, have no fear

We've let our rights be taken away

We believed in their lies

Chant: Give no more, give no more

But we won't let lies stand in our way

And we won't be bound to any law that fear

Makes us obey

[Lead Break]

[Repeat end of the 1st Verse]

[Chorus]
