

# Savatage, Dead Winter Dead

Feel the rush, feel the rush in the back of your head  
"Breathe it in, breathe it in," isn't that what they said  
As you stood in the night 'neath the glow of the fires?  
Watch it burn, watch it burn, watch it reach through the night  
Feel the heat, feel the heat as you bask in its light  
As the puppets hang upon their wires

(chorus)

I've lost my way, kneel down and pray  
It all decays, it takes me down, down, down  
Like the minister said, like the minister said  
Where this all has led... dead winter dead

Can you hear what I hear in the back of your mind  
As you stand on the stage when they tell you it's time  
To read words from a past you can't remember?  
Gotta keep what you have, tell me what is it for  
If it made sense my friend well then not anymore  
Every dream I'm told has its December

(chorus)

I've lost my way, kneel down and pray  
It all decays, it takes me down, down, down  
Like the minister said, like the minister said  
Where this all has led... dead winter dead

(lead break)

(coda)
