

# Saxon, Watching The Sky

Ever since I was a young boy (\*)  
I turned towards the sky  
I know there's something out there  
A message in the skies

When the night is black (\*\*)  
And the dark is dark  
I stand and watch your lights  
I long to be there with you  
And join you in your flights

I been watching the sky (\*\*\*)  
Waiting for you  
I been watching the sky  
Calling to you

I wrote up to the government  
But I got no reply  
They tell us there's no cover up  
But I don't believe their lies

Fifty billion planets  
There's got to be some life  
Don't tell me I'm the only one  
Standing in the night

(Repeat \*\*\* twice)

(Repeat \*)

(Repeat \*\*)

(Repeat \*\*\* three times)
