

Saybia, Eyes On The Highway

Dawn is breaking, in a ray of light
The world still frozen from a cold, cold night
The Northern Star flickers, then let's go the fight
I still orbit the words you say
Your promise of harmony and better days
Honesty, that's what it is
A lag of honesty, that's what it is

You keep your eyes on the highway
Your eyes on the highway
You keep
Your eyes on the highway
Eyes on the highway

Humble but proud I get back on my feet
Driven by an engine's irresistible beat
And let harmony float towards here you and I meet
I've got my head held high and the sun in my face
I'm still part of this magnificent race
Where honesty is all I need
A little honesty is all I truly need

I'll keep my
Eyes on the highway
My eyes on the highway
I'll keep
My eyes on the highway
Eyes on the highway

For me it's sometimes hard to define
What is yours and what is mine
Just tell me the truth and you'll be free
Just look at me, just look at me

You keep your
Eyes on the highway
Your eyes on the highway
You keep
Your eyes on the highway
Eyes on the highway
Just tell me the truth and you'll be free
Just look at me, just look at me
