

Saybia, Godspeed Into The Future

Lately

I've been so desperately trying to find

So desperately trying to find

Something to lean on

While desperately trying to find

Desperately trying to find

A simple answer

In the chaos of my mind

But tomorrow

When the sun's been around the earth

When the sun has been around the earth

I will wake up

And feel no gravety pulling my thoughts

Feel no gravety pulling my thoughts

And the answer

Will find a way to a man

Who will know and understand

And he'll say

Godspeed into the future

To you, my friend

Moonstone

Peacefully gliding through space

Peacefully gliding through space

Doesn't care at all

About the atmosphere coming up ahead

As long as it burns out

In cascades of flames

Resounding

Godspeed into the future

To you, my friend
