

Saybia, Save Me

Im a kleptomaniac, and I am I proud to say that I was once a hypochondriac
As well so tell me what to do ooh
Im scared of going outside coz I could catch a cold, Ill catch another's cold
Im desperate to be arrested coz Im so unsure of what I might do
Save me, before I break the law again
God save me before I make another sin
Now Im getting treated for my mental illnesses
And every night I lock the door to my little lover self
But I forgot to tell Im also claustrophobic
Save me, save me before my head explodes
Save me, save me so I can break my mental code
Now Im starting to get well,
But still i'm scared coz every time I see her child I get erections
So please, save me, save me before my head explodes
Now save me, so I can break my mental code
Now save me, save me before I break the law
Oh save me so I can break my mental code (my mental code)
Save me from myself,
Save me,
God save me from myself
Oh won't you save me?
