## Scary Kids Scaring Kids, Holding On

Just trying to find your way anywhere But you've come to find you're alone Its getting dark and you've lost your way I haven't let you go as long as you know that..

I'm losing what's left of my dignity But ill fight till the end for her heart Ill never give up for what's possibly For better for worse this love must be cursed

Just try to keep your head down But you come to find that trust has come and gone Everyone out there is listening But you don't care at all and you're probably glad to know

I'm losing what's left of my dignity But ill fight till the end for her heart Ill never give up for what's possibly For better for worse this love must be cursed

You already let it pass through your lips you can't take it back now [x4]

I'm losing what's left of my dignity But ill fight till the end for her heart Ill never give up for what's possibly For better for worse this love must be cursed

Holding on to her This love must be cursed I'm holding on to her This love must be cursed I'm holding on

I'm afraid to say she never made it home Couldn't keep her head on She was so close I'm afraid to say she never made it home [x5]
