Sceptic, Waves Of Destruction

How many times you wondered Thought of the stars that shined in the sky How long the sun persisted Does it matter - now it's time to die How long it will all last and when it stops to be Will the catastrophe appear unexpectedly Keeping us all in uncertainty Holding with no answer constantly [Chorus] Almighty force of spatial devastation Coming waves of destruction Came out nowhere to turn everything into dust Like a gigantic black hole approaching incredibly fast Another star system put into trap - soon they will die Empty words - " we can survive " - it is a perfect lie [Repeat chorus] Cosmic cataclysm of entire galaxy - we were defendless Taken lives of billion entities - opposition was pointless We tried to protect mankind - our perfect plan has failed Our planet disappeared - origin of this weapon couldn't be unveiled Technology so advanced - beyond our imagination Planted in a place we cannot reach - out of comprehension We are too primitive - they don't give a shit to our civilization Destroying thousands of systems - earth isn't their final destination
