

# Schizma, One Of Us

watch you rise, never seen you fall  
Through all these years made difference to me  
Made me believe, made me doubt  
What's in our ways wrong n' right  
That's what friendship's all about  
Now you're far but will never be out  
You'll be forever one of us

I watch you rise, never seen you fall  
Like a younger brother who came to overthrow  
Whatever it meant breakin' the walls  
Do what we mean through thick and thin  
Always on point to rock the joint  
Never failed to prove you're not fake  
Never give a fuck 'bout what they say  
Did your thing now forced to break  
You'll be forever one of us
