

Scotty Don't, Wake Up

Find it hard to sleep
Thinkin' bout last week
Late night drinkin' when we left the bar
Or that other show
So many miles we had to go
When I spilt my blood on that guitar
Or those other people
I thoroughly adore
But I just can't be around them anymore
Settle up my tab
Racing for the cab
Or maybe I'll just stumble to my car

I said wake up, wake up
Everybody gotta take up, take up
A new agenda of reality
And forget all the formality

Cause you and me were never meant to be
And I can't go back anymore
A lifetime never ending of this bullshit makes me sick
It ain't for me you can see

I said wake up, wake up
Everybody gotta take up, take up
A new agenda of reality
And forget all the formality
