

Seals and Crofts, First Love

(lyrics and music by James Seals and Eddie Brown, 1980)
From the album THE LONGEST ROAD (1980).

Everybody has a first love, they have left in yesterday.
Feelings they have left behind, it's just a place in time but not so far away.
Everybody has a first love, when the dream they shared was new.
I remember that special someone, so I wrote this song just for you.

First love in my life. Where are you tonight? I wonder about you.
First love in my life. Did things turned out alright? I worry about you.
'Cause I've got everything, everything in life that I wanted.
It would kill me now and make me sad to know you are lonely.
First love never dies.

I wish you love, I wish you happiness. And may the years be kind to you.
You'll always be a part of me, share this thought with me. I'll carry you always.

First love, first love never dies. Remember
First love, first love never dies. I tell you
First love, first love never dies. Remember
First love, first love never dies. Whoa. . .
