See Emily Pray, Pirates And Robots

Technologically nonfunctional
Our society is just not operable
We've got to synchronize our motion
I've fallen for your electronic love potion

Flesh meets metal this is fucked up
Nearly pixel perfect vicious
Binary codings are so sex-a-licious

I'll meet you fire and brimstone
I'm in love with pirates and robots
I wish they'd come to take us home

We've promised non-proliferation
Fast to deny our primal machinations
Eagerly hypnotized in theory desensitized
Just to end this silly race to mechanize

Flesh meets metal this is fucked up
Nearly pixel perfect vicious
Binary codings are so sex-a-licious

I'll meet you fire and brimstone
I'm in love with pirates and robots
I wish they'd come to take us home
