## Semisonic, Sculpture Garden

Twilight in the sculpture garden When we walk around the place Look upon the beautiful secrets That all the artists' made.

How fast the light has faded And we still wanna stay Turn down the noise in the city The dark downtown parade.

At night they turn the water on around the artworks In the garden, In the garden.

Midnight in the sculpture garden Underneath the cherry moon We can make our own beautiful secret We can join the fabled few.

Starlight in the sculpture garden With a stainless steel balloons Rose petal vermillion breezes I beieve the artists knew.

At night they turn the water on around the artworks In the garden, In the garden
