Sepultura, Lobotomy

I've seen you fighting through the time I've followed your steps full of pain Unnamed hero that's challenged the human ego Victim of cowardice

Of strong manipulation A system that was made to lie and to deceive Screams of agony Satisfy the proud

But these screams still echo inside the conscience Contradiction, aggression, desolation, illusion Nonconformity takes my mind Too much injustice to forget so fast

My disgust is greater than my compassion Feel the pain upon my final hour Self-blame can't hurt me Eye for an eye

You receive your just reward Now I'll live my life with indifference I've tortured without remorse I've slaughtered without fear

Brain killing brain Brain killing brain Brain killing brain
