

Sewing With Nancie, My Car

I, I got my new transmission fixed, now it kicks
and I, I got my 5.0 V6, I am slick

Me and you go driving down the street
Waving to the people that we meet
We will drive it far like a shooting star
That is how we do it in my car...

Sing, sing along to my cassette, gonna make you sweat
Sit back, 'cause this is my favourite track, the racecar track

Me and you go driving to the park
Me and you go driving after dark
We will drive it far
Like a shooting star
That is how we do it in my car...

Carbon monoxide's a thing of the past
I only fill up with high octane gas, gas, gas...
(Let's go!)

I, I got my kenwood system fixed, that bass sure kicks
and I, I got my 5.0 V6, I am slick

Me and you go driving down the street
Waving to the people that we meet
We will drive it far
Like a shooting star
That is how we do it in my car
That is how we do it in my car
That is how we do it in my car!
