

Shades Apart, Speed Of Light

Day is dawning- morning will begin
Twilight calling- does it have to end
Can we always be- stay forever running wild and free

Moon descending- tide comes in again
Never-ending- take a long taste of the sunshine
Can we always be- never stop moving

At the speed of light- try to hold on tight
At the speed of light - never stop
there is no end in sight

Waves are crashing- all around us now
Lights are flashing- don't let them burn out
Lying on the beach- nothing else matters- it's just you and me

Infinite summer- nothing has to end
We'll recover- breathe so deep we stay forever
running wild and free- Never stop moving

At the speed of light- try to hold on tight
At the speed of light - never stop
there is no end in sight

(bridge)
When the winter closes in- and the castles
built of sand all wash away
We won't cry for yesterday or tomorrow
We will go on living for today

At the speed of light- try to hold on tight
At the speed of light - never stop
there is no end in sight
