

# Shadowkeep, Beware The Signs

I know a way out of anguish, agony  
The fears to overcome become your enemies  
Take my hand - follow the guide  
And you might reach my sanctuary

Beware the signs of fears

Walls everywhere but there must be a breach  
They want us in the darkness where the light is out of reach  
seek my land and exercise  
your right to think through the answers...

Beware the signs of fears  
Beware the signs of fears

Am I the reaper of the light or a phantom in your dream  
I plant the seeds into the ground but the harvest is your deed  
Am I an angel of the night or the demon in your dream  
I bring you doubt and counterfactuals, I am a part of the machine

It's time to expose religion and all its legacy  
of crystal-ball science-fiction hatching human diseases

Beware the signs of fears  
Beware the signs of fears

Am I the reaper of the light or a phantom in your dream  
I plant the seeds into the ground but the harvest is your deed  
Am I an angel of the night or the demon in your dream  
I bring you knowledge in true light, I am a part of the machine  
I am an angel of the night... I am an angel of the night
