

Shaimus, Red White And Blue

Come live in our free democracy
Where well to do live in harmony
With a patriotic view
Sing our creed, we only act through piety
Through righteousness we will truly see
All the evil in this world

Have a look around, the proud outweigh the practical
These guns are not retractable
No room for another view
Come see our super-loaded magazine
Spraying lead across the sea
At those god-forsaken fools

We'll have them bleeding for you, you
For the red, white and blue
For the pride of these wounds
That we self-inflict for the red, white and blue

Come breathe the cloying air of equality
It stretches back through a history
Of a 'seperate but equal' youth
Come believe in the countrymen in factories
They work so hard so their kids can eat
So good of them to do

We'll have them bleeding for you, you
For the red, white and blue
For the pride of these wounds
That we self-inflict for the red, white and blue
For the red, white and blue
For the pride of these wounds
That we carry on for the red, white and blue

We'll have them bleeding for you, you
For the red, white and blue
For the pride of these wounds
That we carry on for the red, white and blue
