## Shakira, Chasing Shadows

Sunrise blinded by the morning light Already dreaming up tonight And I know That it won't be long Oh, we can't hide From the love that burns this strong

But it's just you and me
And we chase our shadows
We're waiting for, just waiting for
The sun to go down
But until it does
We'll chase our shadows
And when the night comes
We will run from nothing, my love

But it's just you and me And we chase our shadows We're waiting for, just waiting for The sun to go down But until it does We'll chase our shadows And when the night comes We will run from nothing, my love Nothing, my love

Night time
And I am back in your arms
When all my dreams are brought to life
And I know that it won't be long
For we can't hide
From the love that burns this strong

But it's just you and me
And we chase our shadows
We're waiting for, just waiting for
The sun to go down
But until it does
We'll chase our shadows
And when the night comes
We will run from nothing, my love

But it's just you and me
And we chase our shadows
We're waiting for, just waiting for
The sun to go down
But until it does
We'll chase our shadows
And when the night comes
We will run from nothing, my love

But it's just you and me And we chase our shadows We're waiting for, just waiting for The sun to go down But until it does We'll chase our shadows

And when the night comes
We will run from nothing, my love
Nothing, my love
