

# Shania Twain, Last Day of Summer

I think you're funny  
You think I'm smart  
'Cause I can name the planets  
All by heart  
Almost touching  
But too shy to start  
Eyes wide open  
It's way past dark

It's too late to sleep now  
The valley's wide awake  
The early train's pulling out  
Too wired to come down  
It's the last day of summer  
And the first kiss on my lover's mouth

Did you get married  
Or did you wait?  
Did you ever build that house  
Down by the lake?  
Nights still find me  
Lying awake  
'Cause every time I close my eyes  
I see your face

It's too late to sleep now  
The valley's wide awake  
The early train's pulling out  
Too high to come down  
The last day of summer  
Was the first kiss on my lover's mouth

The last time we were together  
Is the first thing I remember  
Every time September comes  
Oh but it's too late to sleep now  
The last day of summer  
And the first kiss on my lover's mouth

The last time we were together  
Is the first thing I remember  
Every time September comes  
The last time we were together  
Is the first thing I remember  
Every time September comes  
But it's too late to sleep now  
It's the last day of summer  
And the first kiss on my lover's mouth
