

Sheena Easton, Carry A Dream

How long is the road
How hard the journey
When do you really know for sure
What you're looking for

Out there in the world
Sometimes it's lonely
Lost in the wonder of it all
Feeling very small
You need a dream or two
To take along with you

Carry a dream
Inside your heart
And from the start
You'll never be alone

Carry a dream
Where ever you may go
And if you believe your dream
It will lead you home

How high is that star
How far above you
See how it shine so clear and bright
Through the darkest night

Out there in the world
Somebody loves you
So keep your eye upon that star
Trust in who you are
And the love will see you through
Just like a dream come true

Carry a dream
Inside your heart
Use it to build
A future of your own

Carry a dream
To last your whole life song
And if you believe your dream
You're already home

Carry a dream
Inside your heart
Use it to build
A future of your own

Carry a dream
To last your whole life song
And if you believe your dream
You're already home
