Silent Civilian, Divided

I'm not the one you'll deceive Choose what I want to perceive You lack the will and control Your church is destined to fall Force those to bow and accept Imposing fear to repent Divide a nation of one Ignore the damage you've done

Free minds destroyed, they kneel Trapped in the lies, you sell

In the name of fascism, you steal Separating what is one, wont heal In the name of your deceit, you sell You condemn those who think free, to hell

Prey on the hearts of the week Give them something to believe Undo their liberal state Revoke the right to debate Your lies of deliverance Scare tactics gain their consent Abortion of the free mind Create the sheep get in line

(Repeat bridge and chorus)

Please believe within you, resist oppression Lies and greed before you, passive aggression Guilt, they'll feed, and scorn you, for liberation

(Repeat chorus)
